

How to start the Bridge Breaker:

1. Plug in and power on control box
2. Insert SD Card into reader
3. Jog the motor up with the up button
4. Attach the bridge

How to Cycle a Bridge Test:

1. Press the green button
 - a. Cycle will automatically stop when the force reduces by 25%
 - b. Red Button can be used to manually stop the cycle
2. Upon completion, the screen will show the log number, max force, and total distance
3. Students should record their log number

How to change the motor speed:

1. The system defaults to 50% motor speed
2. To change, press the Up and Down buttons at the same time
3. Increase or decrease the motor power in 5% increments with the up/down buttons
4. After 3 seconds of inactivity, the control panel will return to the home screen, and is ready to cycle
